*This report is intended to translate your results into an easier to understand form. It is not intended to diagnose or treat. For diagnosis or treatment, please present this to your doctor (or find a doctor on [www.MTHFRsupport.com](http://www.MTHFRsupport.com) under "Find a Practitioner"). Additionally, genetic mutations are flags that something "could" be wrong and not a guarantee that you are having all or any of the associated issues. Other factors like environment, ethnic background, diet, age, personal history, etc all have a factor in whether a mutation starts to present itself or not and when. No two people are alike, and there is no "one size fits all" cure for any of this.*

ATP5g3	rs185584	G	NO CALL		

*This report is intended to translate your results into an easier to understand form. It is not intended to diagnose or treat. For diagnosis or treatment, please present this to your doctor (or find a doctor on [www.MTHFRsupport.com](http://www.MTHFRsupport.com) under "Find a Practitioner"). Additionally, genetic mutations are flags that something "could" be wrong and not a guarantee that you are having all or any of the associated issues. Other factors like environment, ethnic background, diet, age, personal history, etc all have a factor in whether a mutation starts to present itself or not and when. No two people are alike, and there is no "one size fits all" cure for any of this.*
